RECENT AWARDS

I am deeply grateful to my many friends because of their recognition of my small contribution to the flower world. I am also grateful for the expression of friendship and confidence that comes with these awards.

GOLD MEDAL, awarded in 1944 by the American Iris Society for achievement in hybridizing Iris.

FOSTER MEMORIAL PLAQUE, awarded to me in 1948 by the British Iris Society in recognition of work done with Iris.

ACHIEVEMENT AWARD from the North American Gladiolus Council in 1948 for meritorious work in promoting and bettering gladiolus.

DAHLIAS

We do not grow enough dahlias to list in this catalog, but can supply a limited assortment of choice varieties. If interested, we will gladly supply a list of the available varieties. We can also supply high quality Dahlia Seed—See page 12.

GIFTS FOR THE GARDEN

Gifts for the garden are always acceptable and especially so now. Gift of gladiolus and seeds will be enjoyed and appreciated long after they are received.

Our stock is of the best quality and we list the latest and finest varieties. Gladiolus are available from December 1 to June 1; Bearded Iris from June 1 to November 1; Daffodils, Hyacinths, Tulips and Dutch Iris from September 15 to January 1. Seeds at any time.

Gladiolus gift orders for Eastern States received before mid-March will be set aside until proper shipping time. Gift cards announcing the same will be mailed to recipients.

All orders will be carefully packed and sent prepaid. We will supply and enclose appropriate gift card if desired.

GLADIOLUS FOR CORSAGES

Some of the new ruffled gladiolus are very desirable for corsages, especially those in the pink and orchid shades. Some of these are beautiful as any orchid, and because of their heavy texture, they do not crush or break easily, and are long lasting. The tip ends of the flower spikes are most desirable for this purpose.

GENERAL LIST OF GLADIOLUS

All of our bulbs are plump and healthy, and both large and medium bulbs are of blooming size. Many of the small bulbs will give a short spike of bloom. Bulblets will give an occasional bloom, and will produce good size bulbs for the following year.

Large bulbs are $1\frac{1}{4}$ to $1\frac{1}{2}$ inches in diameter or over; medium are 1 inch to $1\frac{1}{4}$ and small are $\frac{1}{2}$ to $\frac{3}{4}$. L means large; M medium and S small.

Our bulbs are grown under the best of conditions but as an extra precaution we fumigate all of our stock with Methyl Bromide which gives 100% kill of all insects and their eggs.

ADD 3% TO COVER TAX ON ALL ORDERS FOR DELIVERY IN CALIFORNIA, AND ANY OTHER TAX THAT MAY BE IN EFFECT AT THE TIME.

Plant in spring soon as heavy frosts are over. In mild climate plant in late fall until mid-July. Where the winters are severe, plant in April and May. Plant in full sun.

GROWING

Do not use dressing too freely. A little bone meal or other dressing dug deep into the ground will produce larger blooms. When planting, never allow the bulbs to touch the fertilizer. Cultivate freely. When cutting the blooms always leave at least five leaves on plant.

DIGGING and STORING

Dig the bulbs from six weeks to two months after flowering. Cut tops close to bulb and burn the tops. Store bulbs in shallow boxes or bags, in a cool well ventilated, frost proof room. Remove old corms from the new bulbs, when they come off easily.
